

## Accounting challenges in corporate treasury

- Quick introduction to corporate treasury (role and responsibility of the treasury team, types of risks a company has)
- What are the options for managing those risks?
- What are the benefits of using hedge accounting for a company?
- Under what conditions can a company apply hedge accounting?
- How should derivatives and hedging transactions be treated under IFRS?
- What is the difference between factoring arrangement and supplier finance arrangement?
- How to account for factoring and supplier finance arrangements according to IFRS?

During this practice-oriented training, participants will gain a comprehensive understanding of the most common derivatives and hedging transactions in corporate treasury together with their accounting treatment according to IFRS.

They will also gain insight into the accounting treatment of customer and supplier finance arrangements.

We recommend our training to those working in the field of accounting and controlling and to those interested in corporate treasury.

# Topics covered during the training:

## Introduction to corporate treasury
