

Mandatory ESG reporting

EU CSRD & ESRS Standards

2-day comprehensive online course by PwC's Academy

At the end of July 2023, the European Commission adopted the final version of the 1st set of the European Sustainability Reporting Standards (ESRS) that further specify the requirements set by the EU Corporate Sustainability Reporting Directive (CSRD, approved in January 2023). The reporting obligations apply to large undertakings and groups who need to include ESG information to their annual management reports.

During this course, participants will orient themselves in the complex structure of the ESRS, learn what to look for and where, and gain confidence in navigating and working with the standards. They will familiarise themselves with the reporting principles that need to be followed to ensure quality and stand up to mandatory assurance.

Participants will learn about the structure, topics and disclosure requirements for the three pillars – E, S and G. They will be able to distinguish the mandatory and voluntary disclosures, as well as those that may be delayed.
